Waterplay | Urbanized

Architecturally and artistically inspired, Elements by Waterplay enhance all urban environments. They invite children to experience the joy of urban landscapes and provide a peaceful sanctuary for adults. Blending organic shapes with 8 dazzling jewel and earthy mineral tones, Elements' smooth lines flow effortlessly in cityscapes. They offer playful water effects by day that transition to softly flowing, subtly lit water by night.

When complimenting a theme or aiming to make a strong, contrasting statement either for a new project or to revitalize an existing space; Elements are essential.

HELICES

Choose from Waterplay's Elements line to create infinitely appealing, completely relaxing environments for children and adults alike.

Solis, no beginning or end...imagine a fluid sheet of water wrapping smoothly around this globe. With tranquility at its core, the Solis can stand alone or join a group of varied or like Elements features. Choose your ideal combination by making use of the diverse Solis size range offering 24, 36, 48 inch or 61, 91 and 122 centimetre diameters. Let creativity inspire you; let Solis create the mood.

Soaring almost 11 feet or 3.5 metres in height, the Tang offers flexibility in configuration and water flow. A cascading sheet flows down both sides turning the Tang into a stunning visual feature while the shower effect on top creates impressive scope and an enticing play area. Flank a path or create a centre point of attraction; Tang offers customization at its best – you decide.

Like dancers, a group of Helices intertwine and bend gracefully on their stage. Their subtle sprays invite passers by for a bit of refreshing fun. Combine radiant rays to light up the night and striking architectural appeal for the ultimate in aqua design. Helices: graceful, modest and playful.

Resembling the remaining drifts which form by streams under glacier ice, Esker rises above the landscape creating a feature unto its own. Utilize Esker's unique LED lighting technology to display a corporate logo or an inspirational message. Further customize the look through the use of colors and your choice of size; small, medium, large and extra-large versions are available.

Fluo's vast expanse will attract attention and make the statement your space has been longing for. Fluo's footprint extends an impressive 16 feet or 4.9 metres with a cascade of water that delights the senses. The sheet of water dances and transforms at the touch of a fingertip. Fluo transforms at dusk and brings with it lighting effects to further enhance the fluid display.

The Elements line maintains the service, support, quality materials and attention to construction detail that Waterplay has become famous for. Bring some Elements into your life.

ESKER

Why is it that water excites a child, yet soothes an adult?
