## Slideplay by Waterplay

Splashing onto the aquatic scene is the massively inspiring Slideplay line by Waterplay. Modular construction and incorporation of Waterplay's ever popular spray components allows you to design your slide for maximum play value. Key features include:

- Multiple slide options;
- Play zone variety with dumping buckets, rain showers and interactive controls;
- Sightlines that provide exceptional visibility of children at all times;
- Compliance with applicable ASTM F1487 CAN/CSA 2614 safety standards;
- Premium materials that stand up to the demands of chlorinated water.

The buzz is out that Slideplay satisfies a need for small and mid-size slide configurations that act as transitional play structures, integrating dry playground-like components into a spray ground setting. Safe has never been so fun!

waterplay

Slideplay has been designed with safety and durability in mind. The rigorous demands placed on slides in high traffic, chlorinated water environments has driven the selection of materials.

Slideplay features:

- Stainless steel construction
- Polycarbonate windows for constant visibility
- Super durable , UV resistant powder coated finish
- Fiberglass slide & deck with anti-slip surface
- High density polyethylene shade cloth
- Modular design with 4 ft & 6 ft slide options

All backed by service & support you can count on:

- Design assistance
- Dedicated Project Management
- Certified Water Quality Technicians
